PERSONAL PROFILE

I 'm a developer with experience in building websites from start to finish, I'm passionate about solving problems, learning new technologies and mastering the ones I already know. At the moment learning Golang with Gin-Gonic, I am organized , like to work as a team and ready for new challenges.

MAIN PROJECTS

Basement Ecommerce

This was a challenge of a company called Basement. Small e-commerce to practice all the options of add, delete and update a Cart .I like the design a lot and with this i practice NextJS, TypeScript, Tailwind, LocalStorage and deploy pages in Vercel
Code : https://github.com/IanRivas/react-basement-ecommerce
Page: https://react-basement-ecommerce.vercel.app/

America Countries

This is an api that give you the information of America countries. I made the api with Nodejs, Express and TypeScript. The frontend app i made it with React, again TypeScript, react-query, styled-components (the app is responsive without mediaqueries). The api and the app was in a monorepo of npm and deployed in Heroku
Code : https://github.com/IanRivas/american-countries-app

EXPERIENCES

Programing Classes

Marzo 2021 a la actualidad

I taught Python with subject like recursivity to some people of my university , Also i tought frontend from html to reactjs and i prepared one person for a FullStack Bootcamp.
I think that teach really help me to finish learning a lot of things and tools.

Computer Technician

2018 a la actualidad

I was and i am really curious about computers , since childhood. That is why i start repairing computers, first for family but later for the people of my neighborhood

EDUCATION

Universidad Argentina de la Empresa (UADE)

Computer Science

I learn a lot of things in college, Python, C and Java ,how to organize a project and work as a team, how to use Linux distributions like Ubuntu or Centos, databases like Sqlserver , Mongodb , Redis , Neo4j , networking and Cloud services above all AWS

COURSES

Platzi Escuela de Javascript FullStack

Develpment of Apps Web - HTML, CSS, Javascript - React - Nodejs

Platzi Escuela de Amazon Web Services

Services like S3, EC2, Lamda, Elastic Beanstalk, RDS and DynamoDb
